UNIVERSITY PROJECTS

E-Trading of Agricultural Products from Farmer to
Customer portal (Grab Grown) | Web Development | Dec
2019 - Feb 2020

- Worked with a group of 6 members and participated in Inter-Level Hackathon 2020.
- Designed Web page in HTML, CSS to provide a bridge of communication between the farmers and customers across the Country.
- Created a Database using MySQL to update the products of farms regularly in our portal and integrated GPS Location of farmer in the database. Connected to web portal using PHP, enhanced Web page Animations using Javascript.

Site Specific Crop Management | Android Development |
Feb 2021 - May 2021

- Worked in Android Studio to build an application that will seamlessly help farmers to cultivate crops, provide a maximum yield as possible, and many other features such as weather monitor, location access, etc.
- The application called "OXYGEN" has been created using HUAWEI KITS and has been published on Huawei AppGallery. The application was built using JAVA and XML.
- App Link: https://appgallery.cloud.huawei.com/ag/n/app/C104177865?locale=en_US&source=appshare&subsource=C104177865
